How's your STORAGE?

MR. FARMER:

Have you ENOUGH STORAGE to do a good marketing job?

With CCC PRICE SUPPORTS, farmers can level out marketings--spreading them over the season to protect crop values.

But price supports won't work without ADEQUATE and SAFE STORAGE.

Over a few years, SAVINGS from orderly marketing will pay for an extra bin or crib.

If you need MORE STORAGE, here's how CCC can help you →

ORDERLY MARKETING PAYS

CCC makes available--
FARM-STORAGE FACILITY LOANS--to
owner-operators, tenants, landlords,
or partnerships of producers--for
the construction or purchase of new
farm-storage facilities which will
meet requirements for eligible stor-
age under the price-support program.

FARM-STORAGE FACILITY LOANS are
available to producers of wheat,
corn, oats, rye, barley, grain sor-
ghums, soybeans, dry edible beans
and peas, rice, peanuts, cottonseed,
flaxseed, hay seeds, pasture seeds,
and winter cover crop seeds.

Such loans are made for as much as
80 percent of the cost of the struc-
ture or 45 cents per bushel of the
rated storage capacity, whichever
is less.

Loans are payable over 4 years, at
4 percent interest.

CCC also makes loans for DRYING and
VENTILATING EQUIPMENT to condition
crops for long-time storage.

Loans may be obtained, with the
approval of the County PMA Commit-
tee, through approved local lending
agencies or direct from CCC through
the committee.

For further details, see your
COUNTY PMA COMMITTEE
